**Joe Rolfe
0427 378 412**

**Smoko and lunch
provided**

- Business management & marketing tips
- Local reproduction data & practical breeder management systems
- Practical yard demonstrations and tips.
- New pasture & hay trials
- Electric fencing options to improve grazing & herd management

We are fortunate to be hosting Dr Ian Braithwaite who is a leading cattle production vet with a great insight into the dynamics and profitability of northern breeding herds. Ian and his team have been working closely with **Bulimba, Haydon** and **Greenhills** to adapt and implement simple breeder management systems.

The DAFF/NGRMG **\$avannaPlan-Beef\$ense** and **Climate Clever Beef** projects integrate sustainable land management and herd productivity with greenhouse gas outcomes. DAFF and MLA have also established 5 trial sites across the northern Gulf to evaluate promising new grasses and legumes.
